McGregor's Bulbs and Plants for Autumn 1908

The Hyacinths are probably the most useful and popular hardy bulbs grown. They come in many lovely shades and are exceedingly beautiful and fragrant. If planted in the early fall, they bloom splendidly very early in the spring, and for massive, yet graceful beauty, superb finish, diversity of color and delicious fragrance, it can be said they are unequalled by any flower. It is the most popular of all bulbs for planting in the open ground, and the ideal flower for indoor flowing in the fall and winter. They are the easiest flowers to grow and are absolutely sure to bloom. Our bulbs are of an extra fine grade, especially selected, and will give the most satisfactory results.

EXTRA LARGE

Hardy Field-Grown Roses

An opportunity to secure extra large Roses—all perfectly hardy, dormant, and all on own roots. (See page 16.)

The persistent demand for extra large hardy, dormant Field-grown Roses for fall planting in open ground has led us to offer them. The list embraces the finest varieties of Hardy Roses, each one famous the world over. The plants are extra large and heavy, ranging in height from 11 to 26 feet, according to variety, thoroughly dormant, true to name, perfectly hardy in all localities, sure to give satisfaction and specially adapted to fall planting in open ground in all localities. These Roses can be set out at any time, up until severe freezing weather, while it is possible to dig the ground, and to the roots. Careful protection they will come safely through the most severe winters, yielding a magnificent supply of flowers next season. These are the kind of Roses usually sold at 75 cents each, while we offer them at a price that represents little more than the cost of digging them. These Roses, like trees, make roots during winter, hence fall planting of this kind of stock always gives splendid satisfaction.

REMARKS

Plants can be sent at any time of the year—Winter, Spring or Summer—if we send your order the following guarantee applies on it.

GUARANTEE—We guarantee all Trees, Shrubs, Plants, Bulbs and Seeds that we send out to be true to name and to reach purchaser in good condition when forwarded by MAIL or EXPRESS freight shipments at purchaser’s risk, and hold ourselves in readiness to replace all stock that may conditionally prove untrue to label, free of charge, or refund the amount paid therefor, but it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not in any case make us liable for a greater sum than that originally received for such stock that may prove untrue. Most failures with plants, bulbs and seeds are due to soil conditions, unfavorable weather and other causes entirely beyond our control, rendering it impossible to guarantee success, and although we will take all possible care to send only such stock as will, under proper conditions, give satisfactory results, we do not, and should not be expected to guarantee stock to grow, or guarantee results in any way, and we can not entertain complaints that are not made promptly after receipt of goods.

METHODS OF PACKING AND FORWARDING ORDERS.

In this catalogue all stock listed (unless noted) CAN BE SENT by mail. There are some items, however, that SHOULD be sent by express, and other items that, on account of size, MUST be sent by express. The packing and shipping therefore is divided into these three methods.

We always use our best judgment in packing and forwarding of all orders, putting them up consistent with safe delivery and future results; and while there are instances where local planting or other conditions make it advisable to have orders sent by express so as to permit of the bali of earth remaining about the roots, still, in a great many instances and to far away points, where transportation charges are high, the soil can be removed from plants of the larger sizes, and too large for mailing packages, and the roots packed in damp moss, and delivery of the plants made at a great saving in transportation charges. We will, therefore, unless otherwise instructed, use our best judgment in executing such orders, believing that at times, and where our customers are not aware of the best methods to use, their orders can be executed more satisfactorily. It should, therefore, be understood that if particular packing and forwarding instructions are to be followed, they should be plainly stated under the above heading “Remarks.”
OUR COVER ILLUSTRATIONS

COVER COLLECTION OF MAY FLOWERING TULIPS
ILLUSTRATED ON FRONT OF COVER.

Each year the May flowering Tulips increase in popularity until they will soon far surpass in favor the early flowering varieties. They are more sure to produce perfect blooms because the late frosts do not affect them as much as the earlier varieties; they are superior in brilliancy of coloring and length of stem, and they remain in bloom a greater length of time. Of the many varieties of this class we have selected the five finest for this collection and offer them to you as follows:

1. Late Tulips, Artus—The finest brilliant scarlet Tulip grown.
2. Narcissus, Double Von Sion—The true Easter flower or double yellow Daffodil; very large and double.
3. Giant Crocus—Five named varieties, all different, producing from four to eight giant flowers to each bulb.
5. Giant Crocus, Parrot—Petals deeply fringed and cut, brilliant scarlet, striped yellow and green.

The above ten May-flowering Tulips, by mail, postpaid, for 30 cents. Four of these May-flowering Tulip collections, by express, for $1.00.

COVER COLLECTION OF BULBS (ILLUSTRATED ON BACK OF COVER)

These bulbs, illustrated on the back of this cover, will bloom well if forced for winter blooming in the house or planted outdoors for spring flowering, though all bulbs bloom better when planted out in open ground in early fall. The varieties here offered are the best of their class and cannot fail to please you with their fine blooms.

2. Narcissus, Double Von Sion—The true Easter flower or double yellow Daffodil; very large and double.
3. Giant Crocus—Five named varieties, all different, producing from four to eight giant flowers to each bulb.

Price, nice plants of any variety, 15 cents each; two for 25 cents each.

NEW EVER-BLOOMING PRIMROSE (PRIMULA OBCONICA CARMINEA)

Illustrated on front of cover.

Obconica Sanguinea—Identical with the above varieties except in color, which is a dark pink with markings of lavender; fine grower with distinct foliage.
Obconica Grandiflora Alba—This is a plant of new introduction and very much superior to the old Obconica. The flowers are pure white and borne in the same manner as the Chinese Primrose. On account of the large flower, stiff and long stem and the pretty foliage, it has attracted a great deal of attention at the late flower shows.

25 cents; $1.25 per dozen, postpaid. Large plants, any 40 cents; $2.00 per dozen, postpaid.

The New "Christmas" Collection

15 Large Bulbs Sent Postpaid For 50 Cents.

After careful testing, consultation with our Holland bulb growers, and painstaking study, we have succeeded in forming a collection of winter-flowering bulbs which can easily be brought into bloom at Christmas time by any amateur. This collection will give you a window garden full of brilliant, fragrant and delicate flowers for several weeks. Buy the bulbs early in the fall, and plant them at once in pots or boxes. Water them abundantly immediately after planting, cover the tops of the pots with leaves or excelsior, and place in a dark closet or cellar for four or five weeks, until the roots are well grown. Bring them out to a sunny window three or four weeks before the blooms are desired, as the tops will grow strong and rapidly after the roots are well grown.

These directions apply to the Hyacinth, Tulips and Narcissus, but for the Chinese Sacred Lily see directions on page 12.

Select Named Single Hyacinths

PRICE, YOUR SELECTION, 10 CENTS EACH.

The Single Hyacinths by many are not so highly thought of as the double, yet they are to be preferred for bedding, as the truss is not so heavy, and consequently does not fall over, but stands erect. While the individual single bells are not quite so pretty as the double, the grace of the erect truss makes it better for pot culture also. We have revised our list, and can safely say we offer you the cream of Single Hyacinths now grown.

The Largest Flowered CHOICE VARIETIES

SINGLE PURE AND TINTED WHITE
La Belle Blanchisseuse—Extra large waxy-white bells; an excellent variety and choice for cemetery planting.
L’Innocence—One of the best of the new pure white Hyacinths; very broad, loose truss of immense bells; very fine. Grandeur a Merveille—Finest blush-white; a graceful, large truss exquisitely tinted creamy-pink.

SINGLE RED, ROSE AND PINK
King of the Belgians—Brilliant crimson-scarlet; upright spike, splendid bedder.
Sarain Bernhard—A beautiful, brilliant rose compact spike.
 Moreno—Bright waxy-pink; very large truss and bells; splendid sort for pots.
Rosalie—A delicate silvery-pink; very early; one of the finest sorts.

SINGLE BLUE, LAVENDER, PURPLE
Marie—A rich bright purple, the darkest of the Single Hyacinths; fine in connection with the light colors. Grand Maitre—Very large spikes of clear blue; one that we can recommend for any purpose. La Peyrouse—An unusual sort, with sky-blue bells with graceful spikes of great size.

SINGLE YELLOW
King of Yellows—Rich, deep yellow, tall spike; large bells; early.

SPECIAL OFFER One Each of the 12 Named Single Hyacinths for $1.00, Postpaid...

Unnamed Single Hyacinths in Separate Colors

We recommend single-flowering Hyacinths for bedding, as they hold their blooms more erect and give much more satisfactory results. You can do no better if you want a fine display for a small amount of money than to order a goodly lot of the following splendid bulbs. We offer these fine single Hyacinths in separate colors, as follows:

We offer them in the following separate colors:

PURE WHITE  BLUSH WHITE  ROSE  PINK  RED  LIGHT BLUE  BRIGHT BLUE  PURPLE  YELLOW

Price, 5 cents each, 60 cents per dozen, by mail, postpaid.

EXPRESS OFFER OF UNNAMED HYACINTHS

By Express, 50 cents per dozen for any of the above UNNAMED DOUBLE HYACINTHS in separate colors.

For $3.50 we will send by express (purchaser paying the charges) 100 Hyacinths in any color or colors, single or double, which will make a bed of fifteen feet in circumference or five feet in diameter composed of five rows planted six inches apart. If your bed should be of another shape or larger, and would require more than 100, we will offer them at the same rate.
Tulips are the most satisfactory of spring-flowering bulbs. There are few more extremely hardy and of easy culture, blooming as freely and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. One of the prettiest ways to plant them is in the soil next the foundation of the house, where they will come up and bloom year after year with no care.

All the varieties named below are well adapted for bedding and pot culture, especially the Duc Van Thol sorts, which can be forced into bloom by Christmas with very little trouble.

They are of a dark velvety-scarlet, shading to maroon and having a satiny-white stripe in the center of each petal. In form more graceful than any Lily we know of. If planted in the same manner as the Chinese Sacred Lily the blooms will appear much sooner, but will not last so long as when planted in earth. IXIAS

The Ixias produce their beautiful flowers in spikes, and are of the most dazzling and brilliant colors and sure to attract great attention. For pot culture in the house they give great satisfaction. DWARF CALLA "GEM"

LILIAM CANDIDUM
Annunciation or Madonna Lily—This is one of the most popular of garden Lilies. The flowers are pure snow-white and very fragrant, borne on long stems. To succeed with it, it should be planted early in the autumn, so that it can make some growth before frost; give the bulbs a light dusting with powdered sulphur, and do not cover with more than two inches of soil. They may remain undisturbed for years and thrive well. Price, 15 cents each; four for 50 cents. Ready in September.

LILIAM HARRISII
Bermuda Easter Lily—This magnificent Lily is undoubtedly the best for winter forcing, as it comes quickly into bloom. The flowers are trumpet-shaped, pure white, gracefully formed and delightfully fragrant. The bulbs should be potted in early fall in rich soil, and the pots plunged in sand, where they should be allowed to remain until the approach of cold weather. The freedom with which the flowers are produced is truly remarkable; even the smallest bulbs blooming freely. Price, 20 cents each; three for 50 cents. Ready in September.

SPECIAL NOTICE
Many of the finest Lily bulbs come from Japan and are not received in this country until November. They can not be obtained earlier as the bulbs are not shved until fully matured. Where bulbs are offered for sale earlier than the latter part of November, they are bulbs which have been kept in cold storage and thereby have lost much of their vitality and will not grow as well as fresh bulbs. Therefore, we advise the preparation of the Lily beds or borders early in autumn, covering them with four to six inches of leaves or litter of any kind. This will keep them open and admit of the planting of the bulbs even if not received until December.

DO NOT FORGET TO PROTECT YOUR ROSES

If you plant out Roses in the yard this fall, after the leaves have fallen, give the beds a covering of manure, straw, or Cedar boughs, corn fodder, leaves or street sweepings, enough to keep the roots from freezing, but still not to smother the plants. In very cold localities it sometimes pays to wrap the entire bushes in straw or bend them down to the ground and fasten them to stakes driven for the purpose; or cover with boards, as the principal object is to keep the plants dry and from the freezing and thawing at times of storms and sleet and rain. But the matter of protection is not such a serious problem these days when good new Rose plants can be obtained at a very low price. Many people feel that the blossoms produced the first season are worth many times the cost of the plants, and so buy new ones each year.

Old Reliable Hardy Climbing Prairie Roses

DECORATIVE FERNS

For the House and Conservatory

These beautiful plants for home decoration vie with the Rubber Plants for first place in the esteem of flower lovers. They are finely cut and sometimes oddly shaped. Fronds have a graceful effect produced by very slender stems of other plants. With practically the same care as given flowering plants they do exceedingly well in the parlor and conservatory. The Ferns of the Pteris family do as well as the Sword Ferns; the best varieties for the house are to be found in the Pteris family. The Nephrolepis family of which the well known "Osrella" is a member, has furnished us so many beautiful species of late years and are succeeding so well that this family is steadily growing in popularity. Varieties we list on this and the following page are all recommended for indoor growing in pots as specimens or for ferneries for table decoration.

Nephrolepis Whitmanii—(See cut opposite at top of page.) We never sold a Fern that has created so much favorable comment as the Whitmanii. It seems to delight in hot weather and hence seems to be perfectly at home here in the summer. Combining all the graceful plumelessness and charm of Elegansima, with additional features of shape, size and growth which give it distinction and added commercial value, Whitmanii is of dwarfer growth, but equalizes matters by compactness and a wider, stockier shape. The fronds, although even more fine cut, are more erect, and have proved less liable to revert to the original Boston type. Price, nice young plants, 15c; each; larger plants, 25c; 50c each, postpaid. Specimen plants, 75c.

Nephrolepis Piersoni Elegantissima or Tarrytown—This is a sport from the Pierson Fern, in which the plumy peculiarity of the original form is even more distinctly developed than in the original, the side-pinnatvee being again subdivided and growing at right angles to the direction of the midrib, makes both sides of the frond equally beautiful, while at the same time the plant is of much more compact habit than the original, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Price, nice young plants, 15c each; larger plants, 25c and 50c each, postpaid. Specimen plants, 75c.

Nephrolepis Scotti—It is in essence a condensed form of the Boston Fern, with valuable characteristics added which are so evident in the standing an average plant in an eight-inch pot having 900 fronds. The fronds of the plant described average about twenty inches in all in width at the widest point; the pinnae are very closely set, so that they overlap, making a more finished frond than the parent. The plant in question might be spread of three feet. Plants in four-inch pots showed a spread of eighteen inches and a height of ten to twelve inches. It has a crispness and hardness about it which is superior to the parent, and because of the fact that its character is established in the smallest size, it should find ready sale at all grades. Price, nice young plants, 15c each; larger size, 25 and 50c.

Nephrolepis Exaltata Bostoniensis (The Boston Fern.) This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than in the common Sword Fern, and do not stand so stiff, but droop over in a graceful manner. Excellent for making large specimen plants, also very fine for hanging baskets. Strong and rapid grower. Price, nice young plants, 10c each; larger plants, 25 and 50c.

Nephrolepis Piersoni (Ostrich Plume)—An entirely new form of the famous Boston Fern. The fronds grow in the most luxuriant manner, the pinnae subdividing, making miniature dividing miniature fronds, which is perimposed on the main fronds, looking as if two or even three, were condensed in one. They are graceful and beyond description—feathery, plumes, describe them better than "Ostrich Plumes," which they very much resemble. Fronds arch over in wavy irregularity. Price, nice young plants, 15c each; larger plants, 25 and 50c.

Adiantum Cuneatum Grandiceps. The Beautiful Maiden Hair Fern—A very beautiful form of A. Cuneatum, having long graceful fronds, with the ends of the fronds developed into bunching tasseled heads. Price, 10c each; three for 25c, postpaid.
The Beautiful Gold Fern of Australia

(Gymnograma Alstonii)

This exceedingly novel and beautiful variety bears leaves of a dark green on the upper surfaces, while the under surfaces are richly covered with a deep golden farinose powder. It is a most striking plant when viewed from beneath, while from above the unfurling young fronds show the rich golden color. Be careful to avoid watering the foliage of this Fern, set the plant in water instead of watering on top. This is quite important in growing this variety. Price, 20c each.

Onychium Japonicum—A very beautiful Fern, having long, graceful fronds. The wavy texture of the leaf makes it keep a long time; very useful to cut for vases, etc. Price, 10c each; large size, 25c.

PTERIS ARGYREA (Silver Fern)—A very showy Fern, with variegated foliage, fronds large, light green, with broad band of silver-white down the center of each. Very distinct. We have a large stock of this beautiful Fern. Price, 15c each; large size, 25c each.

PTERIS CRETICA ALBO-LINEATA (Broad Leaved Silver Fern)—A very pretty and useful variegated variety distinctly showing the clear white variegation. A useful and easily grown Fern. Price, 15c each; larger size, 25c each.

CYRTOMIUM FALCATUM (Holly Fern)—We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, yet it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a rose leaf. The fronds are fine for cutting on account of their lasting quality. Price, 15c each; two for 25c.

ADIANTUM VENOSUM (Maiden Hair Fern)—A very beautiful form of A. Cuneatum, having long, graceful fronds, with the ends of the fronds developed into bunching tasseled heads. Very similar to Cuneatum Grandiceps, only having a little larger leaf, and stronger grower. Price, 10c each; three for 25c; large plants, 25c each.

PTERIS TREMULA (Shaking Fern)—The foliage of the Pteris varieties is large, very graceful. The slightest movement of the air shakes the leaves of this kind, which we recommend more than any other for house culture, etc. It grows readily and very fast. Keep the leaves from dust and sprinkle slightly every warm day. Price, 10c each; three for 25c; large size, 25c each.

PTERIS WIMSETTI (Crested Fern)—A very pretty and useful Fern for specimen or dish. Green leaves with the ends very peculiarly crested. This Fern is not generally known. It is one of our best varieties for dishes, being a short, compact grower and will stand rough treatment. Price, 15c each; large, strong plants, 25c each.

BEGONIA REX KING OF THE BEGONIAS

We make a specialty of this marvelous family of plants, which are without doubt the most beautiful ornamental foliage plants in existence. Descriptions and illustrations fail to convey an idea of their exquisite color effects, which include nearly every known color. We offer a fine collection of the finest varieties, including new and rare kinds that cannot be had elsewhere. They require light soil composed of rich loam, loose woods earth and sharp sand. They like a moist, warm atmosphere, and should be kept shaded during the summer. Do not allow the sun to strike the leaves when wet, or do not over-water. Be sure to try a few of these wonderful plants.

SPECUALTA—Quite a novelty in the Rex type. Leaves are in the form of a grape leaf. Color is a bright green, with a background of chocolate; veins of a light pea-green, the whole leaf spotted with silver. In bloom it is magnificent, the panicles, composed of great numbers of individual pink blooms, are lifted high and spray-like quite clear of the foliage. Price, 10 cents each; three for 25 cents.

DUCHESS DE BRABANT—This fine variety is very distinct, having a dark greenish-brown center, with a broad silver band enclosed with a dark green edging. The edge of the leaf is smooth and very pointed. Price, 20 cents each; three for 50 cents.

LORD PALMERSTON—One of the best and easiest to grow of all the Rex Begonias. The leaves are extra large with a dark bronze center, silver band and irregular bronze border, blotched and specked into the silver. The edge of the leaf is fringed and irregular; under side a pale green with red veins; very effective. Price, 20c each; three for 50c.

MD. TREVE—One of the most distinct and striking of all Rex Begonias. Very highly colored, especially when the light shines through the leaf, which makes it a bright red. The star-shaped center and the narrow border of the leaf is a reddish-green dotted with silver spots, and the balance silvery-white. A fine Begonia of the large-leaved type. Price, 20 cents each; three for 50 cents.

MAGNIFICA—This beautiful variety is quite different from any variety we have catalogued. The leaves grow to an immense size, color a rich dark chocolate-brown tinted with dark green. This variety is one of the darkest of all the Rex family. Price, 20 cents each; three for 50 cents.

THE KING OF REX—One of the most effective of its class, though the oldest variety. Of a beautiful metallic luster, center and edge a soft velvety-green, with a broad silver zone terminating at the point. The foliage of this Begonia on well-grown specimens is so massive and the growth so majestic as to awe the beholder. It is of the very easiest culture. Price, 15 cents each; three for 40 cents.

ROI FERD MAJOR—Extra large leaf of fine silver, small dark starry center, and edge embossed in the same dark shade. Extra fine. Price, 15 cents each; three for 40 cents.

Choice Fruit for Fall Planting

FRUITS OR TREES BY EXPRESS OR FREIGHT

The following nursery stock is offered by Mail or Express as noted. The varieties offered are tested standard kinds and for reason of lack of space we do not attempt any descriptions. As our nursery department is separate and distinct from our greenhouses, it is necessary that all nursery stock be shipped direct from the nursery, and all orders, therefore, for trees and fruits of express size will be sent separate from bulbs or greenhouse plants, and will be under separate transportation charges. If it is no time better than fall for planting and if a little extra soil is placed around the base of the plant, pressing in shape of a cone, so as to protect the roots from winter rains and sudden and severe changes in freezing and thawing, all planting should do well. This also protects them from being moved about by heavy winds. As mentioned above, remember that fruits and trees under this heading, which will be of as large size as offered by any nurseryman, are sent by express or freight separate from any other part of your order and under separate transportation charges.

FRUITS OR TREES BY MAIL POSTPAID

Under this heading we offer you grafted and true to name fruits and trees of a smaller size than referred to above, but they will be found much cheaper and all transportation charges will be paid. It is a slower way than buying larger trees, but is the cheapest way if you are willing to wait an extra year or two. Our steady increasing list for Mail Order gives us great satisfaction. We think plants under this heading will especially appeal to those in distant states and where it is not convenient to call for express or freight shipments.

NO PREMIUMS ON FRUITS OR FRUIT TREES

Prices on nursery stock are placed very low and we cannot allow premiums to be selected on orders for items listed on this page.

HARDY PHLOX

This notable family of hardy perennials is perhaps the most widely known and popular of all the various plants which we have in our gardens, and each year finds the newer and shower varieties increasing through the hybridizer's skill. Certainly no perennial is more worthy of culture, more satisfactory in every situation, or more effective, planted individually or in groups. All Phlox are well adapted for cutting and are exceedingly floriferous. The plants bloom in midsummer and the gardens can be kept almane from June until frost. All colors in shades delicate and rich, with flowers ringed, eyed and shaded. They succeed in good garden soil, but are greatly improved by being liberally manured. When in flower they should be watered freely. Phlox usually flower in July and August, and in order to render them autumnal-flowering it is necessary to pinch the shoots about the first of July. Plants will then flower in September. For early flowers, leave the plants unpinned.

The best time to plant Phlox is in the autumn. The strong plants we offer will flower freely next season.

Fine Double Herbaceous PEONIES

The wonderful improvements made during recent years in these old-fashioned hardy plants, have made them immensely popular. After they are once planted, they require little attention and care, thriving almost anywhere, and are absolutely hardy everywhere, requiring no protection whatever, even in the most severe climate. They do best in good, rich soil and an open, sunny position, but this is not absolutely necessary. They like a liberal supply of water during their growing season. The abundance and wealth of the gorgeous flowers which they produce are sufficient to satisfy the most enthusiastic, their flowers rivaling the finest roses in size, form and coloring. They are not troubled with insect pests or disease of any kind, and, once planted, they take care of themselves, increasing in beauty each year. We offer herewith some of the newest and most beautiful varieties in cultivation.

PURE WHITE. Large and full. 25 cts. DEEP CRIMSON. Very effective. 25 cts. SHELL-PINK. One of the finest. 25 cts. The 3 for 50 cts.

The Best Novelties in Colors—Crimson, White, Bright Pink and Light Shell-Pink

ALL EARLY-FLOWERING. IF YOU WANT THE BEST, HERE THEY ARE

The following four varieties we offer as the best grown in the different colors and are not to be excelled by any other kinds in the Peony family. Apparently they are expensive, but the superior quality of these four named kinds over other standard varieties of this popular plant is greater than the difference in quality in any other family of flowers.

FELIX CROUSE. All Peony enthusiasts are familiar with the fact that it is difficult to get a red Peony that is a self-color—that is, a full, rich, even shade of red without being suflused with a shade of another color. Felix Crouse fills the bill. A rich, even, brilliant, ruby-red, exceptionally fine peony, large and effective; full bell-shaped bloom. Unique in color. 75 cts. each.

FESTIVA MAXIMA. This is not only the finest white in existence, but, in most quarters, is regarded as the queen of all the Peonies. Mr. Harrison says: "This flower has reached the ultimate, beyond which we cannot go." It combines enormous size with wondrous beauty, often 7 to 8 inches in diameter; color snow-white, flecked with an occasional clear purple spot on edge of center petals; in addition, it is very fragrant. 50 cts. each.

GIGANTEA. This is one of the newest and most sought after in cultivation. The finest of all Peonies for cut-flower purposes. It is one of the earliest to bloom, produces an enormous flower 6 to 7 inches in diameter, on long stems; deliciously fragrant. $1.25 each.

MARIE STUART. Large bloom, coming in clusters; outer petals soft pink, center pink and sulphur-white; very chaste bloom. Pleases everybody. 75 cts. each.

SPECIAL OFFER. One each of the best of Novelties, Felix Crouse, Festiva Maxima, Gigantea and Marie Stuart ($3.25 value) for $2.95. One of our very best offers.

NOTE.—In ordering Peonies we would advise ordering them by express. You will get larger roots, which will give a much more satisfactory plant.
